

Lithuanian Gigabit Optical Module Multimode

Overview

Operating at 850nm, these highly cost-effective multimode modules deliver flawless 1.25Gbps performance for links up to 550m. Manufactured in our class-100k cleanrooms to ensure absolute signal integrity for enterprise server rooms. Maximize cost-efficiency for localized single-mode. Multi-mode optical fiber is a type of optical fiber mostly used for communication over short distances, such as within a building or on a campus. Multi-mode fiber has a fairly large core diameter that enables multiple light modes to be. Use one of the options below to locate your desired product. Operating from our advanced manufacturing hub in Wuhan, we provide fully customized, meticulously tested SFP solutions that guarantee flawless interoperability across. The line of Intellinet Network Solutions Small Form Factor Pluggable (SFP) Transceivers provides customers with a combination of performance and affordability. The optical transceiver is designed for use in 100/155Mbit/s data links. By eliminating the need to maintain.
