

# Maximum port size of PoE switch

## Overview

PoE switches with 8 to 16 ports typically meet the requirements of small or home networks. From small offices to large enterprises, PoE switches come in various configurations to provide both power and data to connected devices. Delivers max power and speed for advanced UniFi devices—all through one cable. 6U-sized device rack with a 24-port blank patch panel that. However, the total PoE Budget is 370W, which is 15W per Port, if all ports are in use. The typical load of AP410C is 17. Using up to 20 APs per Switch should work. Actually, the Internet speed is drastically affected by your ISP, the Internet backbone, the remote website server, traffic on your local node, and more. In PoE mode, each port can provide 15. Each standard specifies the power capacity for PoE power supply, and these power supply standards are also backward compatible, enhancing the flexibility during usage.

### 8-Port PoE Switch

Overview This 8-Port PoE switch transforms network dynamics with 8x 10/100/1000M POE+ Uplink and 2 Giga-bit RJ45 ports. Crafted with precision, it delivers IEEE 802.3bt PoE++ at 90W on Port 1,
