

Modular Data Center Outdoor Type for Operation and Maintenance

Overview

The Modular Prefab DC has two categories: Room-in-Room (RIR) for indoor applications and Containerised Data Center (CDC) for outdoor applications. The CDC has attributes for outdoor applications such as waterproof, dust-proof, fire-proof, seismic resistant and. Interact with a 3D model to view IT Pod features, and design details. Open this page with such a device to experience AR. Please try again later or contact us if the problem persists. It looks like your browser or this site. Perfect for your outdoor data centre: We have translated our expertise as the market leader for high-tech modular constructions into an all-in-one solution for IT and telecommunications. With an ideal floor plan, aesthetic appearance and maximum energy efficiency, we offer you the optimal solution. Modular Data Centers (MDCs) can solve those challenges in an economical, fast and energy-efficient manner. MDCs optimize time-to-market with their pre-fabrication and assembly process, significantly reducing. Eaton's modular data center solutions are designed to your specific needs and easily scalable and space saving with no customer white space consumed.
