

Mozambique s own power distribution box

Overview

The power station is operated by Hidroelectrica de Cahora Bassa (HCB), a Mozambican parastatal company. HCB sells 65 percent of its output (about 1,349 megawatts), directly to South Africa via the 1,420 kilometres (882 mi) Cahora Bassa-Johannesburg High Voltage Transmission. Mozambique, a southeastern African nation blessed with vast natural resources, holds the top spot in the Southern African Power Pool (SAPP) for energy potential, boasting an estimated 187 gigawatts from coal, hydroelectricity, natural gas, solar, and wind (Mozambique Power Generation). Yet, its. Combination of the following data sources: 1) data collected and prepared for a project of the World Bank Group in May 2015 2) The Africa Infrastructure Country Diagnostic (AICD) study 3) OSM data © OpenStreetMap contributors This data is partially based on a digitized PDF map, and so is intended. I the Just Energy Transition Strategy. By 2024, Mozambique's electrification was divided into 46% on-grid, 2% mini-grids and the emaining 8% solar home systems (SHSs). Available energy sources include coal, hydroelectricity.
