

Netherlands Pluggable Optical Module OSFP

Overview

OSFP (Octal Small Form Factor Pluggable) is a pluggable optical transceiver interface standard that supports eight electrical lanes (Tx/Rx) per module. Each lane can operate up to 100G PAM4, allowing total bandwidths of 400G or 800G depending on configuration. Product to be exhibited at OFC 2026 at the AuthenX booth (Booth #5204), Los Angeles, United States from March 17-19. 0 standard as a new product in its. While the industry-standard OSFP (Octal Small Form-Factor Pluggable) module has successfully enabled 400Gbps, 800Gbps, and 1. 8Tbps of switching. The OSFP MSA is proud to introduce OSFP1600 and OSFP-XD to the industry. This whitepaper highlights the key aspects and features of each solution with the expectation that both solutions will have a place in future data center applications. Unlike the backward-compatible QSFP-DD, OSFP introduces a slightly larger mechanical form to. GIGALIGHT provides the smart box tools for online coding of SFP, XFP, SFP+, QSFP+, and QSFP28 optics, as well as wavelength tuning for 10G tunable XFP/SFP+ optical transceivers. Each module needs a small but precise set of support ICs — multi-voltage conversion, hot-plug load switching, rail supervision, and signal level shifting.
