

# New Standard for Three-Level Distribution Boxes on Construction Sites

## Overview

This fact sheet explains how to apply the requirements shown in AS/NZS 3012:2019 Electrical installations – construction and demolition sites (AS/NZS 3012:2019), which is called up as a mandatory standard by section 163 of the Work Health and Safety Regulation 2025 (WHS Regulation). Communication, coordination, and cooperation are essential prerequisites for working well together and safely. The Construction Site Ordinance also obliges the building contractors to take into account occupational safety and health in the planning phase. The general principles set out in Section 4. In a newly constructed residential area, a 10kV power line is introduced into the substation. After stepping down the voltage through the transformer's low-voltage side (0.4kV to the distribution cabinet (primary distribution cabinet), then the outgoing line is led to the. Summary of Three-Tier Power Distribution System: Primary: The main distribution panel, supplies power from the transformer.
