

ODF rack-type fiber distribution box

Overview

Fiber optic distribution frame (ODF), also known as fiber patch panel or optical distribution frame, is a rack-mount or wall-mount enclosure that provides organized termination, splicing, and patching of fiber optic cables. It provides fiber fixing, splicing, termination, patching, and cable management in telecom rooms, data centers. Austin Hughes ODF (optical fibre distribution frame) is designed with highest capacity and superior cable management. It is an ultimate solution which provides flexibility to meet the specific needs of customers and configure the frame to optimize their network. Engineered with durable cold-rolled steel and a smooth powder-coated finish, this branded unit offers structured cable. Netceed provide a range of fibre distribution racks (ODF), from leading brands like CommScope, HUBER+SUHNER and Prysmian.
