

Operating Procedures for Polymer Cable Trays in Australia

Overview

This SWMS applies to the installation of electrical cables, supports, and ladder tray systems, including unloading, handling, storage, cutting, installation, and securing of trays in walls and ceilings. Instruction on this safe work method statement. EzyStrut offers some of the strongest cable trays in their classes, and produces them to a very high structural and visual standard. In addition to the Telecommunications (Cabling Provider) Rules 2025, you also need to understand and follow: Telecommunications (Types of Cabling Work) Declaration 2024. It replaces traditional methods such as conduit piping or manual bundling with a more accessible, modular system. Common types of cable trays include: In solar installations, cable trays. This 9-page Cable and Ladder Tray Installation Safe Work Method Statement (SWMS) provides the typical safety controls and possible hazards associated with the installation of cable trays and ladder trays in various workplace environments. Developed by WHS experts, this pre-filled and ready-to-use. We offer a range of FRP or GRP Cable Management Systems including trays, ground ducts, ladders, accessories, supports, fittings, and fixings. These systems provide a safe transport of any wires or cables across open spans.
