

Opgw24-core optical cable 6

Overview

OPGW optical cable has the dual functions of ground wire and communication optical cable, eliminating the huge cost of repeated erection and maintenance; it is installed on the top of the power overhead line tower, without considering factors such as hanging points and. OPGW optical cable has the dual functions of ground wire and communication optical cable, eliminating the huge cost of repeated erection and maintenance; it is installed on the top of the power overhead line tower, without considering factors such as hanging points and. CentraCore optical cable houses and protects the optical fibers within a central gel-filled stainless steel tube inside an aluminum pipe. Aluminum-clad steel and aluminum alloy wires are stranded around the central element in single or multiple layers. High quality standards for designing, testing and. Optical fiber composite overhead ground wire (OPGW) 1. Application OPGW is mainly applied in communication line of newly constructed high voltage transmit electricity system with 35 KV or above, or replacement of existing ground wire of previous overhead high voltage transmit electricity system. OPGW Central AL-covered Stainless Steel Tube is characterized by aluminum-clad steel cable or mixed ACS wire and aluminum alloy wire for winding, which increases the cross-section of the pipe and improves fault current and lightning protection performance. Installed at the top of high-voltage and extra-high-voltage transmission lines, OPGW cables provide lightning.
