

Outdoor cable trays for overhead cable laying

Overview

Our engineer's guide helps you choose the right outdoor cable tray based on environment, load, and corrosion resistance. Select HDG, Aluminum, or FRP with confidence. They can endure harsh weather conditions, such as rain, snow, wind, and extreme temperatures, guaranteeing that electrical installations stay safe and reliable. Non-Conductivity: Required in areas with sensitive electronic equipment or where fault current is a concern. Fiberglass (FRP). Is your cable tray system optimized for safety, dependability, space and cost savings?

Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and. We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore.
