

Overseas warehouse optical cable terminal box 2 cores

Overview

The 2 Cores Fiber Distribution Box (FDB-102A-1) IP-55 SC Connector PLC Splitter is a compact and rugged outdoor enclosure designed to provide a safe and secure environment for fiber optic cables and splices. Access Terminal Box, also known as a fiber optic wall outlet or fiber wall socket, is a critical component of modern optical networks. It provides a secure and convenient location for fiber optic splicing, connecting the drop cable and the passive optical equipment of the optical network terminal. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function. It fully supports mechanical/fusion splicing, termination, and cable management within a single, compact indoor unit. · Splice and patch cord use separation. This 2-core optical termination box features a sliding cover design, providing high protection.
