

Precision rack switch status monitoring

Overview

With switch monitoring, you can track switch status and quickly determine used and unused ports, fans, loosen or unseated connection details of the switch in the IBM Fusion HCI. This topic provides you instructions and guidelines to monitor switches from the Overview dashboard page. In a small rack monitoring solution we are interested in monitoring few critical parameters: power, temperature. It is critical to monitor the performance of your rack, especially the temperature, humidity, leakage, power, and airflow. When faults occur, to ensure the uptime of equipment, the monitoring system can perform actions automatically (e. activate additional fans, sound an alarm, or send alarm. Discover the remote monitoring solutions for racks by Vertiv, which can enhance your network management processes, from the power supply to the rack monitoring.
