

# Pricing of Fiber Optic Layout for Network Cabinets

## Overview

This guide shows the cost landscape, with clear low-average-high ranges and per-unit pricing to help plan a project. Cost ranges for fiber optic projects vary by run length, fiber type, and whether the build is indoor or outdoor. The main cost drivers are materials, installation time, and environmental factors that affect trenching, conduit, and terminations. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Multilink's Fiber Distribution Hubs are setting the standard for cross-connect configurations, configurable splitting, plug-and-play technologies and many other fiber architects. Our line of FDH cabinets can be ground mounted, pole-mounted, and wall-mounted. All cabinets with a width of 80 cm.
