

# Primary distribution box 150 kW

## Overview

It has capacity for 150 kW, accepts 480 V or 600 V 3-phase input, and distributes 208 V 3-phase power to equipment racks and Rack Distribution Panels (RDPs). Primary power can be either from a commercial power plant, diesel engine driven prime power generator sets, or from another SDC. The SDC is designed to accept primary power at 4160VAC, 60Hz, or 3800VAC, 50Hz, 3-phase from any. PD150G6F - InfraStruxure PDU 150kVA 480V/208V. The Icecat Product ID is the unique Icecat number identifying a product in Icecat. This unit provides operators the ability to safely tap into and distribute 480V AC power from a variety of sources. HVC Remote box power cabinet set 150 kW and 24 V power supply box, CAN2Ethernet communication, CE certified, to be used in combination with Depot box double CCS or CCS control box or CR control, ready for sequential charging. distance between power cabinet and charging interface is 100. EXN three phase low voltage dry type distribution transformers from Square D comply with DOE energy conservation standards and Natural Resources Canada (NRCan) minimum energy efficiency levels. This transformer is a 150kVA, 480V primary (three wire), 208Y/120V secondary (four wire) with aluminum.
