

Protective Platform for Level 3 Distribution Box

Overview

Install the Level 3 surge protection device inside the equipment or at the equipment's power supply input, especially for critical or sensitive electronic devices. Technical Requirements Maximum discharge capacity: 20kA per phase or lower. Voltage protection level: $\leq 1800V$. According to the principle of graded lightning protection, and based on the likelihood of a building being struck by lightning, it is necessary to. Surge protectors (Surge Protective Devices, SPD) installed in distribution board panels are primarily used to protect electrical equipment from transient voltages (surges or spikes) caused by lightning strikes, power grid fluctuations, or other factors. We will be glad to provide you with extensive support from initial information, planning, configuration and. Solera's surface-mounted boxes provide durable protection for electrical installations in industrial environments. Quick installation: Safe and easy mounting process. Essential for quarries or heavy industrial zones where dust concentration hits $50\text{mg}/\text{m}^3$ or higher.
