

Requirements for grounding wire of 12-core fiber distribution box

Overview

Conductive fiber optic cable per NEC 770. 100 must be grounded through a bonding or grounding electrode conductor. listed 6 AWG copper. This Applications Engineering Note (AE Note) discusses conventional bonding and grounding practices for conductive fiber optic cable and hardware installations within the scope of the National Electrical Code (NEC). However, component design should also take account of future requirements to extend operating wavelength to 1675nm. Suppliers shall provide information on the likely change in performance efficiently handled and. NEC 250. 148 (Grounding Conductor): Requires metallic junction boxes—and by extension, cabinet doors—to bond to ground using a designated grounding screw or clip. FO-VC2 JOINT USE - VERICAL MIDSPAN CLEARANCES 48.
