

Requirements for the installation of electrical distribution boxes in factory buildings

Overview

The bottom of the board (box) installed on the ground should be 5-10 mm higher than the ground; the center height of the operating handle is generally 1.2 m in front of the box; the protective wires are reliable; bare charged. Requirements of a stable electrical distribution system in warehouse construction 2. Choosing suitable electrical components and equipment for factories, pre-engineered steel storage building 3. Site selection requirements: The distribution box should be installed in an area close to the power supply to reduce. The dimensioning of an electrical plant requires knowledge of different factors relating to, for example, installation utilities, the electrical conductors and other components; this knowledge leads the design engineer to consult numerous documents and technical catalogues. This electrical. First of all, you need to have a simple understanding of the definition of a distribution box, and make it clear which kind of distribution box you want to install.
