

STM-4 optical communication equipment

Overview

The STM-4/622Mbps 40km SFP optical transceiver module is a component used in telecommunications and data networks. The SDH frame structure and Small Form-factor Pluggable (SFP) are the successor of the GBIC optics and are currently the most widespread pluggable optics on the market. Depending on the cable type (multimode or single-mode fiber), wavelength (850 nm, 1310 nm, 1550 nm or CWDM/DWDM) and data rate, the SFPs are available in. Valiant Communications manufactures telecom transmission equipment and solutions with installations in over 110 countries, worldwide. Valiant's technological strengths span a wide section of the telecom transmission area including GPS PTP Grandmaster Primary Reference Clocks, IEEE-1588v2. The Lentonics™ TN1U SDH Multiplexer delivers powerful optical networking solutions for critical communications applications. Table 1 provides the functions and features of the SLQ4. Transmits and receives 4xSTM-4 optical signals. STM-1 and STM-4 SDH Multiplexer Solutions: Next generation SDH multiplexers provide E1/DS3, E3/DS3, 8 port 10/100Base-T Ethernet, 2xSTM-1 optical, 2xSTM-1 electrical / 140Mbps tributary interfaces.
