

Splitter Green and Blue

Overview

This tool automatically splits any image/photo into corresponding RGB channels. Intensity of a particular channel is given as the total intensity $\div$ total area. There are 3 primary colors: Red, Green and Blue, also called RGB colors. How to separate RGB values of an image?

The image will be analyzed and the result will be returned in gray level for each color, from. This is a free online tool that allows you to create RGB split effect in images. RGB split effect, also known as RGB shift or chromatic aberration, is a visual effect that works by separating the red, green and blue color channels of images and adjusting X and Y offsets, to create glitch-like. This tool was made by Axel Berggraf Egenæs. If you want to contribute, you can check out the project on GitHub. Thanks to Norsk Risoforening for support! Color mixer or Color Blender is one of many browser tools available on the ColorDesigner website.
