

Standard Requirements for Cable and Optical Fiber Installation Processes

Overview

163 describes criteria for the installation of optical fibre cables defined in Recommendation ITU-T L. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. The charter of the FOA was to promote professionalism in fiber optics through education, certification, and. Recommendations for Fiber Optic Cable Installation Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. The cable should be bent as little as possible. 110 in remote areas with lack of usual infrastructure for installation including the procedures of cable-route planning, cable selection, cable-installation scheme selection. The new standard from the Fiber Optic Association is subtitled 'Guidelines For The Construction And Installation Of Fiber Optic Cable Plants. NOTE: The below considerations are not intended to encompass all installation practices.
