

Survey before building a communication tower

Overview

For a cell tower to be constructed on vacant land, a Raw Land Tower Site Survey must be completed, as well as a Boundary Survey. The lifecycle of telecom tower installation usually follows several stages. Each stage plays a crucial role in ensuring the tower becomes a reliable part of the telecom network. At RLF Consulting, we provide Telecommunication Land Surveys for Cell Tower Development, delivering accurate wide-area surveys quickly and efficiently to meet the needs of. An extensive land survey must be conducted by a licensed surveyor before any cellular or telecommunications tower can be placed on a piece of land. Point to Point Land Surveyors has over 20 years of field experience in telecommunication land surveys, with results guaranteed to be accurate. As a surveyor specialized in telecommunication tower surveys, understanding how to meld traditional surveying techniques with modern data analytics is indispensable. From identifying potential signal obstructions to assessing physical infrastructure constraints, site surveys are. By utilizing comprehensive tools for engineering & design, we perform site identification, evaluation, and verification towards the potential sites for Potential BTS and MW Antenna Location with efficient and optimum Frequency usage In the context of cell tower infrastructure, a pre-engineering.
