

The circuit breaker in the distribution box tripped after a thunderstorm

Overview

The first step involves switching off and unplugging every appliance and lamp connected to that circuit, ensuring no load is present. Once the circuit is unloaded, firmly switch the tripped breaker all the way to the “Off” position before resetting it back to the “On” position. Following severe weather, the sudden tripping of a circuit breaker is a common and frustrating occurrence for many homeowners. The breaker is performing its intended function, interrupting the electrical flow to prevent potential damage or fire. But don't panic! In this guide, we'll dive into what a. But what about when a storm causes your circuit breaker to trip?

It's a problem that many homeowners have experienced, and it's important to know what you should do in the event of a breaker trip due to a storm. Water can enter areas it doesn't belong, and when it.
