

The distribution box is placed on the exterior wall

Overview

Bottom Line Up Front: Your home's distribution box (electrical panel) is typically located in the basement, garage, utility room, or mounted outside near your electrical meter. Covers wiring, placement, standards, and expert tips for a compliant setup. To find it quickly, look for a rectangular gray metal box about the size of a medicine cabinet, often positioned close to. An outdoor electrical distribution box serves as the critical junction point where incoming power lines are split into multiple branch circuits for outdoor installations, parking lots, building exteriors, and industrial facilities. It receives power from the main electrical supply and divides it into separate circuits, each. The installation of a new distribution box takes place in several phases, which must be carefully coordinated. The first step is to choose a suitable location.
