

# The distribution box is recessed

## Overview

A home distribution box recessed is an embedded enclosure installed within walls or partitions to centralize and manage electrical circuits, low-voltage wiring (like Ethernet, coaxial, or phone lines), and sometimes HVAC controls. The distribution box (DB box) helps safely and efficiently distribute electrical power. Today, electrical systems are essential for homes and industries. A recessed electrical enclosure is an electrical box that sits inside a wall, floor, ceiling, or column instead of sticking out. It keeps the space looking neat, saves room, and still protects all the wiring and devices inside. For example, in a house, it might be mounted near the meter. Enclosures with 1 to 4 rows, 13 to 72 modules, surface-mounted on GTL or. When selecting a home distribution box recessed unit, prioritize fire resistance, cable management efficiency, and compatibility with your wall type—especially if installing in drywall or concrete.
