

The fiber optic router I switched to is no longer keeping up

Overview

Many fiber internet problems come from dirty connectors or loose plugs, not major faults. Power cycling or restarting your ONT (Optical Network Terminal) often resolves simple troubleshooting internet issues. Use the table below to see expert-recommended first steps for fiber. Fiber can improve the connection coming into your home, but it can't automatically fix what happens after that signal reaches your router, your Wi-Fi, or, ultimately, whichever devices you want to use. Think you know your routers from your repeaters — put your home networking know-how to the. The solution is either to turn on QoS on your current router, or switch to a router that does QoS. Ideally you want a router that will do fq_codel, and that can handle gig throughout even with QoS turned on. but every time i see a post with Fiber optics i feel broken. did you reset your freebox delta before connecting to fiber?

did you disconnect the ADSL cable?

did you use the repeaters with the VDSL as well?

What speed did you expect. To paint an accurate picture, our house is of newish construction, no convoluted layout and our previous sky broadband setup whilst speeds were not amazing had very little connectivity. Here's the good news: more often than not, fiber internet slowdowns can be fixed quickly and easily.
