

Tuvalu communication optical cable core number

Overview

The specification's minimum configuration is 2 cores per 48 points. Of course, 4 cores can be selected for 48 points, because 2 cores are the smallest unit of optical fiber, it is more appropriate to leave 2 more cores as backup. The Tuvalu Vaka Cable is the first international telecommunications cable connecting Tuvalu, being a branch of 688km linking Funafuti, the capital of Tuvalu, with the trunk of the Bulikula cable system, part of Google's Pacific Connect initiative. Vaka embodies the spirit of connectivity and. Tuvalu's connection is delivered through branching unit integration into the Central Pacific Cable (CPC) submarine network, providing permanent high-capacity international fiber connectivity to the country. The total project value is estimated at USD56 million (AUD80 million equivalent). Project name: Tuvalu Vaka cable. ♦ NTT developed the world's highest-capacity 192-core submarine cable system using multicore optical fiber (MCF), enabling a fourfold increase in transmission capacity without changing the submarine cable system.
