

Using a 450Mbps router with a 100Mbps fiber optic connection from a telecom company

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. The "450mbps WiFi" is a theoretical best case. If the device ports are all 100Mbps and I provide the router with 300Mbps directly to WAN, how can it give more than 100?

how is this not related?

2. well 70-90 is too far from 450, it can't even reach close to 150!The process to connect fiber optic cable to router requires careful attention to detail, but I'll walk you through every critical step with the precision and clarity you deserve. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly recap why fiber optics are worth the effort: Lightning-fast speeds (up to 1 Gbps or higher). of the router?

Geben Sie Ihren Kommentar ein. Most important for Telekom lines is to use PPPoE over VLAN7.
