

What are the hardware requirements for fiber optic cable laying

Overview

What tools are required for fiber optic installation?

A complete fiber installation toolkit includes a fusion splicer or field termination kit, cleaver, fiber strippers, optical power meter, light source, and an OTDR for comprehensive link testing. The Fiber Optic Association, Inc. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. The charter of the FOA was to promote professionalism in fiber optics through education, certification, and. A fiber optic conduit protects the fiber optic cable from damage. The conduit's minimum inside cable diameter must be large enough to accommodate the cable, at least 0.75 inches for single-mode fiber. Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. During installation, all curvatures should be smooth. FO-VC2 JOINT USE - VERICAL MIDSPAN CLEARANCES 48. FO-RI JOINT USE RISER. Determine the optimal cable route and assess environmental factors.
