

What does a fiber optic cable sheathing technician do

Overview

They install and maintain fiber optic cables, as well as provide technical assistance in the designing and testing of fiber optics. They often work for telecommunications companies, but they may also find employment with cable installation companies and other businesses that require high-speed, high-capacity data. Fibre optic technicians maintain digital and fibre optic systems and install broadband internet and phone networks. What does a fibre optic technician do?

As a fibre optic technician, you will install and maintain fibre optic telecommunications, such as broadband, mobile and landline phone. The role of a Fiber Optic Technician involves the installation, maintenance, and repair of fiber optic cables, which are crucial for high-speed data transmission and communication infrastructure. These technicians play a pivotal role in ensuring the efficiency and performance of telecom networks. A fiber technician plays an integral role in the telecommunication industry – keeping us connected through telephone, high-speed internet, and television.
