

What is a fiber optic cable suspension string

Overview

Optical Cable Preformed Suspension String is a durable accessory designed to securely support and suspend optical fiber cables on overhead transmission lines. SRR and outer rods cannot be reused. Twisted chain link 2b Eye chain link 3 Armour grip suspension clamp 4 Parallel Groove clamp 5 Earthing connector To consult details about steel fittings, earthing connectors and guy grip dead end ADSS cable accessories are simply fittings that are used to fix the ADSS cables to the poles so that the cables can perform their duties as required. ADSS Accessories. Generally composed of inner strands, outer strands, a heart-shaped ring, and an embedment ring. The inner strands are tightly wound around the optical fiber cable, while the outer strands wrap around the inner strands, connecting to utility poles or other fixing devices through the heart-shaped. suspension clamp Type: fiber suspension clamp Classified into different types according to the span of the optical cable, common types include: AXC-100/12, AXC-200/13, AXC-400/13.
