

What is the white color of cable trays

Overview

This is an E-1 color code (formerly known as a K-1 code) because it includes both a white and green conductor. As a result, this tray cable may not work for every situation. Per NEC guidelines, white is meant to serve as the neutral conductor, while green is only used. Depending on which end of the cable you're looking at, you can read the colors clockwise or counterclockwise from the center black conductor. Let's say you cut your cable and see this series of colors: black, white, red, green, orange, and blue, in that order and in a consistent pattern. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. B manufactures its cable tray in a range of materials with a variety of finishes. Aluminum's exceptional corrosion resistance, particularly. Cable Safety and Protection: Good trays shield your cables from getting squashed, cut, or damaged. Cable Trays and Reels - Outlines available color options for Cablofil's wire mesh cable trays.
