

# What qualifications do telecommunications towers need

## Overview

What training paths are common?

Options include short-term certificate programs (often 3-6 months) and apprenticeships (1-2 years). What certifications do employers commonly require?

Many employers look for OSHA 10 or 30, CPR/First Aid, RF Safety, and NWSA TTT-1 or TTT-2. Where do tower technicians. Quick Answer: To become a tower technician, complete a training program at a trade school or technical institute (2-6 months for a certificate), then earn required safety certifications (OSHA 10, TTT, Competent Climber/Rescuer). However, accelerated programs might take you less time if you can commit to intensive study. You should have knowledge of wireless network technologies and standards, such as 4G, 5G, LTE, and Wi-Fi, as well as the ability to use tools and equipment, like drills, wrenches, voltmeters, and spectrum analyzers. What Education Do You Need to Become a Tower Technician?

Your journey starts with a high school diploma or GED certificate. This foundational requirement ensures you have the basics covered: Should You Pursue Additional Education?

While not mandatory, some employers give preference to candidates.
