

# Which companies produce photovoltaic tracking modules

## Overview

The US-based company NextPower has claimed the top rank in Wood Mackenzie's global PV (photovoltaic) tracker manufacturer rankings based on the data for the first half of 2025, with Chinese manufacturer Trina Tracker following in second place and another US-based company, Array, in. The US-based company NextPower has claimed the top rank in Wood Mackenzie's global PV (photovoltaic) tracker manufacturer rankings based on the data for the first half of 2025, with Chinese manufacturer Trina Tracker following in second place and another US-based company, Array, in. As solar PV power generation continues to grow, solar businesses, developers, and investors are relying on solar PV (photovoltaic) trackers or solar trackers more than ever to generate electrical energy and maximize solar projects' ROI under cost pressure. Furthermore, a solar PV tracker purchase. During the conference, PVBL announced its annual ranking of the top 15 global PV tracker brands. In 2024, the global photovoltaic tracking market experienced significant growth, fuelled by strong demand from the United States, the Middle East and Latin America. Their commitment to innovation and quality ensures that clients receive reliable and effective solutions for maximizing solar energy. This sector primarily consists of manufacturers and service providers who offer various types of solar trackers, such as single-axis and dual-axis systems. With continued investment and technological advancements, the industry is set to grow further, driven by the global push towards renewable.
