

Which construction site electrical distribution box has double-layer protection

Overview

ENERGY METALBOX range consists of construction site distribution boards in metal cabinets with technopolymer socket-outlets. The steel sheet enclosure is fitted with double lock doors to prevent non-authorized persons from accessing connection and disconnection operations. Type 1 Enclosures constructed for indoor use to provide a degree of protection to personnel against access to hazardous parts and to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt). Secondary Distribution Box: Serves each floor or building as needed. BLOCK Series distribution assemblies are made of thermoplastic material. At Esswin Electro Controls Pvt Ltd, we manufacture high-quality Construction Distribution Boards (DBs) designed to provide safe and efficient power distribution at construction sites. Our IP 65-rated DBs are built to withstand harsh outdoor conditions and ensure maximum electrical safety for.
