

Will the price of optical modules continue to fall in the future

Overview

Shifts in pricing for optical modules will continue to be the result of technology advancements and changing market needs. (100G or above) adds complexity in production, and a gradual price increase is expected during the adoption. The optical module and data center interconnect (DCI) market is experiencing significant expansion, driven by the escalating demand for high-bandwidth connectivity, cloud computing, 5G networks, and data-intensive applications. The market, projected to reach \$14.7 billion in 2025, is forecast to. Optical Module Package Market was valued at 8942 million in 2024 and is projected to reach US\$ 20220 million by 2032, at a CAGR of 12.2 billion by 2033, growing at a CAGR of 10. Telecommunication networks (wireless and wired) are the second-largest application, contributing 28% of market revenue in 2022.
